Customer Reviews

I came across this book because I had bought a LaGana Tactical Tomahawk (VTAC) for use on one of my deployments to Iraq but it never came in time for me to bring, but was able to deploy back to Afghanistan with it in tote. I guess I thought I was going to do some close-quarters combatives on Taliban/Al-Qaeda vermin with the final blow eliminating the threat and ending it with the "trophy" scalping. Needles to say I did not ever scalp any one... or really ever planned to. But I now owned this Tomahawk and need something to do with it. My intentions when purchasing this Tomahawk, was due to the history I knew of the weapon being used by Rangers (Rogers Rangers from the Colonel days mid 1700s) up to Vietnam and on into Iraq/Afghanistan by other units. Incidentally the VTAC was modeled after the style used by rangers in Vietnam. So knowing its historical use I decided I would give it a whirl and replace my "bowie knife" with it that I had carried on my kit. So as I started to say I came across this book online as I order my Tomahawk, I bought the book not with the intention of learning how to wield this thing in combat but to read something with information on the historical background and history of the Tomahawk in combat. This book did just that the author

went into painstaking detail to fit into this book whenever possible background information and historical material to authenticate his points on various aspects of this weapon in combat and training. The book primarily deals with early history of the weapon (17th and 18th century) and its employment in that timeframe.
